Project Design Phase
Proposed Solution Template

Date	4 April 2026
Team ID	SWTID-2026-3550
Project Name	Streamlining Ticket Assignment For Efficient Support Operations
Maximum Marks	2 Marks

Proposed Solution

S.No.	Parameter	Description
1	**Problem Statement (Problem to be solved)**	Manual ticket assignment in support systems leads to delays, incorrect routing, increased workload, and poor customer satisfaction.
2	**Idea / Solution Description**	The solution is an automated ticket routing system that assigns tickets to the appropriate team based on predefined rules, roles, and groups. It includes workflow automation, real-time notifications, and dashboards for monitoring ticket status.
3	**Novelty / Uniqueness**	Combines role-based access control with workflow automation to ensure accurate and instant ticket assignment. Reduces human intervention and minimizes routing errors.
4	**Social Impact / Customer Satisfaction**	Improves user experience by reducing delays and ensuring faster issue resolution. Enhances productivity of support teams and builds trust in the system.
5	**Business Model (Revenue Model)**	Can be offered as a SaaS-based support solution for organizations. Revenue can be generated through subscription plans, enterprise licensing, and customization services.
6	**Scalability of the Solution**	The system is scalable using cloud infrastructure and can handle increasing users, tickets, and organizational complexity. It can be extended with AI-based automation in the future.

Summary

The proposed solution provides an efficient, scalable, and automated approach to ticket management, ensuring improved operational performance and customer satisfaction.
