Ideation Phase
Empathize & Discover

Date	4 April 2026
Team ID	SWTID-2026-3550
Project Name	Streamlining Ticket Assignment For Efficient Support Operations
Maximum Marks	4 Marks

Empathy Map Canvas

User Type 1: Support Team Member

1. Says

- “There are too many tickets to handle.”
- “Assigning tickets manually takes a lot of time.”
- “Sometimes tickets go to the wrong team.”

2. Thinks

- “There should be a faster way to assign tickets.”
- “Automation could reduce my workload.”
- “Mistakes in assignment affect overall efficiency.”

3. Does

- Manually reviews each ticket
- Assigns tickets based on understanding
- Reassigns tickets when mistakes occur
- Coordinates with other teams

4. Feels

- Stressed due to workload
- Frustrated with repetitive tasks
- Concerned about delays and errors

User Type 2: Customer / End User

1. Says

- “My issue is urgent.”
- “Why is my ticket taking so long?”
- “I need quick support.”

2. Thinks

- “The system should resolve my issue faster.”
- “Maybe my request is not being handled properly.”
- “Support should be more efficient.”

3. Does

- Raises support tickets
- Follows up on unresolved issues
- Waits for updates or responses

4. Feels

- Frustrated due to delays
- Impatient when issues are unresolved
- Dissatisfied with the support experience

Insights Gained

- Manual processes create inefficiency and errors
- Lack of automation increases workload and delays
- Both support staff and customers are negatively impacted
- Faster and accurate ticket routing is critical

Conclusion from Empathy Map

Understanding both support team members and customers highlights the need for an **automated ticket assignment system** that reduces manual effort, improves accuracy, and enhances overall user satisfaction.
